

“Construction of a part of a local road from v. Bansko-municipality of Strumica to v. Monospitovo-municipality of Bosilovo”

The road from the interchange near the greenhouses in v. Bansko-municipality of Strumica to v. Monospitovo-municipality of Bosilovo, extends at a length of 2.368,82 meters and is an unpaved road.

Without modern road infrastructure, communication among the population, regional economic development, and easy access to the touristic, cultural-historical and natural rarities near this micro region are made difficult or impossible.

Currently, the unpaved road is used only by agricultural producers for access to their agricultural areas, on which there are greenhouses for growing vegetables early. The bad condition of this unpaved road makes the transport of agricultural products difficult, which leads to the reduction of their quality.

The construction of the local road consists of preparation for new roadway construction, defining and arrangement of shoulders, preparation of a horizontal and vertical solution, and solving the drainage of atmospheric waters.

With the construction (i.e., the modernization of this road), communication between the two populated areas and the surrounding areas will improve. Nature-lovers, who visit and stay in this region, will have easier access to the natural monument “Monospitovsko Swamp” because it is near this road.

Brief project description:

Project leader:

- Centre for development of the South-East planning region

Project partners:

- Municipality of Bogdanci
- Municipality of Bosilovo
- Municipality of Valandovo
- Municipality of Vasilevo
- Municipality of Gevgelija
- Municipality of Dojran
