

Construction of a local road that connects the villages Murtino and Ednokukjevo in length - 1,387 meters - second phase

The road transport and infrastructure play a key role in economic development, increasing the number of tourists in the region, improving the communication between the citizens of the surrounding settlements, access of farmers to their fields and to wholesale markets, developing a modern and functional infrastructure, as well as the living standards of the population.

The purpose of this project is the development of road infrastructure in the length of about 1390 m that will connect the villages Murtino and Ednokukjevo.

The improved road infrastructure will enable easier communication among the three municipalities, faster and safer transportation of passengers and goods. This road will be of great benefit to the farmers because they will always be able to use it in order to facilitate their arrival to farmland and transfer of products to the markets that are located adjacent to the micro-region.

The construction of the local road from v.Murtino to v.Ednokukjevo to final stage of pavement construction and its use will be of great importance for improving of local, economic and tourism development, as well as for the citizens of these settlements because greater cooperation between the three municipalities will become in the future,
