

"Reconstruction of road from the crossroad of the village Dobrashinci to dam Turija from KM 0 + 0000 to KM 0 + 800 in Municipality of Vasilevo"

**Agency for Financial Support of
Agriculture and Rural Development**

**THE CENTRE FOR
DEVELOPMENT
of the SOUTH-EAST REGION**

The development of a region depends on several factors. One of the most important is the qualitative and quantitative level of construction of physical infrastructure. Every society aims at providing a higher and better living standard, which essentially means constant improvement of living conditions.

This project refers to the reconstruction of road infrastructure on part of the road leading to the dam Turija, one of the most important tourist sites on the territory of the Municipality of Vasilevo, which despite it is being used as a primary source of drinking water for the city of Strumica, it is also used for fishing and recreation.

The road is of range of the access roads which starts at the crossroads with the regional road that leads to the village of Dobrashinci, continuing to the Turija Dam. This road is of local importance which in the future would be raised to a level of access street for the local community. The reconstruction of this road infrastructure on a part of the road will enable the tourist site Dam Turija to be visited by local and foreign tourists, in order to increase the tourist and economic development of the Municipality of Vasilevo and the entire region.

The project will be implemented with the support of the Rural Development Financial Support Program for 2018 from the Agency for Financial Support of Agriculture and Rural Development under measure 323, Preservation and promotion of traditional values in rural areas.
