

Revitalization of the road v. Bogorodica v. Stojakovo - crossroads with regional road Gevgelija - Bogdanci (second phase)

The impact of this project is of great importance for regional development because the construction of the road infrastructure will be the basis where will be developed a number of factors that are of regional importance for the South-East planning region. By developing a quality road network, in addition to improving the quality of transport from one place to another, it also means facilitating the exchange of goods, and the communication between the local population.

With this project, the common interests of the population from the municipalities of Gevgelija and Bogdanci will be realized, the communication of the citizens between the villages Bogorodica and Stojakovo will be improved, costs for transport will be reduced and the agricultural products will be improved. Easier access to wholesale markets in the region and the Republic of North Macedonia will also be provided, but also easier export abroad.

The revitalization of the road Bogorodica - Stojakovo leads to improvement of the road infrastructure in the municipalities of Gevgelija and Bogdanci and improvement of the living conditions of the citizens in this part of the region, which enables greater economic development of the municipalities and the entire South-East region.
