

Less waste for better life quality

Bureau for Regional Development
Биро за Регионален Развој

THE CENTRE FOR
DEVELOPMENT
of the SOUTH-EAST REGION

Changes in climatic parameters have a strong impact in temperature rise per year, changes in precipitation and the quantity thereof. Besides the impact they have on people with respiratory and cardiovascular problems, it has an impact on agricultural and forest crops. Even more significant is their impact on the hydrometeorological parameters that include groundwater and surfacewater, i.e. their use.

The cleaning of the wild landfills will provide protection and improvement of the quality and condition of the environmental media: soil, water, air; the areas of the environment, biodiversity and other natural resources, reducing toxic emissions, and thus protecting the ozone layer and protecting humans from the negative impact of climate change. All this will contribute for a better quality of life and preservation of the health of the citizens in the region.

South-East planning region has a beautiful nature that is excellent base for development of tourism. Presenting a clean and healthy environment will increase the visits of foreign and domestic tourists, and all this will contribute for better economic development of the region.

Through this project, the illegal landfills in the municipality of Radovich will be cleared and the collected mixed waste from the illegal landfills will be transported to the landfill Sushica which is located on the territory of the municipality of Radovich. This will cover part of the South-East region, but that the benefits of this project apply not only to the citizens of this municipality, but also to the citizens of the region and even the daily visitors. It is also an incentive for other mayors in the region to consider the importance of clearing illegal landfills, as one of the biggest problems in the modern world.

Short description of the project

Project Leader:

- Centre for development of the South-East planning region

Partner:

- Municipality of Radovish
