

# Construction of a local road for connecting the settlements Borievo and Koleshino - first phase

Bureau for Regional Development  
Биро за Регионален Развој

Local roads are of great importance for the regional development of planning regions, for the local economy, for attracting new investments, small businesses and agricultural activities. For that purpose, it is necessary to create conditions for development, arrangement and construction of local roads in the South-East planning region that will improve the living standard.

This project is especially important for the visitors of Koleshino waterfalls and Monospitovo Swamp which because it is difficult for them to travel to these tourist sites in different weather conditions and extends the time for traveling. The use of this road also causes problems for traders and farmers, which in turn increases transportation costs and losses due to the reduction in the quantity of trade and agricultural products.

The project will be implemented through the Ministry of Local Self-Government - Bureau for Regional Development, the Municipality of Bosilovo and the Municipality of Novo Selo.

## Short description of the project

### Lead partner:

- Centre for development of the South-East planning region

### Partners:
