

„Installing of urban equipment of Kochulski Waterfalls“

Tourism is one of the main strategic goals appointed in the Programme for development of the South- East planning region. The South-East planning region has many tourist destinations and opportunities for development of the tourist offer. The potentials of the region are based on the development of tourism, but are not sufficient to attract domestic and foreign tourists. In order to play a great part in the economic development of the region, it is necessary to invest in the tourism infrastructure, better presentation of the tourist offer as well as strengthening the capacities of the human resources.

The Mountain Belasica is one of the most important and the most beautiful tourist destination in the South-East planning region, so it is necessary to treat and continuously invest in its arrangement, in order to take advantage of its potentials. Investing in development in new tourist attractions such as "Installing urban equipment of Kochulski wateralls" will have a positive impact on the development of tourism in the entire region.

At the moment, the waterfalls are visited by the local population from the Municipality of Valandovo and part of the mountaineering associations in the region, but with the arrangement of equipment, in the future, will be opened up the possibility for more frequent visits to a larger number of local residents, citizens from the region, as well as foreign tourists who enjoy tourist places of this type.

Within the realization of this project, an arranged tourist place will be provided where citizens will recreate and enjoy the nature beauty.

Brief description of the project:

Project Leader:

- Centre for development of the South-East planning region

Project partners:

- Municipality of Valandovo
- Municipality of Dojran
