

“Preparation of technical documentation for construction of local road v. Borievo – v. Koleshino in length of 6,3 km”

The communication between the residents of both villages Borievo and Koleshino is difficult, especially for the pensioners and people with disabilities, because these two villages are connected by road that is unpaved, narrow and in very bad condition.

The use of existing or surrounding roads, which are also in very bad condition is causing numerous problems for farmers, such as increased costs, losses caused by decrease of the quality etc. This road is also a direct connection of the farmers to the main distribution center in the village Koleshino and to their agricultural land in the area.

On the other hand, tourists who come to visit the tourist sites through this road are facing inadequate road infrastructure, discomfort while traveling and delayed time of arrival to their destination.

The construction of the road v. Borievo - v. Kolesino will improve communication between the citizens of the surrounding populated areas, the transportation of agricultural products to the distribution centers and therefore to the markets outside the country. This project will also enable development of tourism with easy access to tourist sites in the region.

Short description of the project:

Project leader:

- Centre for Development of the South-East Planning Region

Project partners:

- Municipality of Bosilovo
- Municipality of Novo Selo

Duration:

6 months

Financed by:

- Bureau for Regional Development
- Centre for Development of the South-East Planning Region
- Municipality of Bosilovo
- Municipality of Novo Selo

Objective of the prproject:

The overall objective of this project is to improve the local road infrastructure, thereby enabling increased economic development in the South-East planning region
