

„Reconstruction and reparation of the local road axis from the interchange Karbino, M-6 (Strumica – Shtip) to the populated place Dobrashinci“

The Local road, interchange Karbino, M-6 - Dobrashinci is located northeast in length of 5000 meters. The road is planned for two-way traffic on two lanes for all kinds of motor, bike and pedestrian traffic.

During the exploration the road is quite burdened because it is going through an active agricultural area and it also leads to the communal landfill of Strumica and Vasilevo, where heavy specialized vehicles pass every day to carry out the garbage.

Especially important is that this section is an access road to the regional landfill "Dobrashinci" which will be built in place of the existing landfill. The regional landfill is of particular importance since it will be the first of its kind in Macedonia, and will serve Municipalities around the South-East region.

Short description of the project:

The project leader:

Centre for Development of the South-East Planning Region

Partners:

- Municipality of Vasilevo
- Municipality of Novo Selo

Duration:

- July 2010 – Decembre 2010

Financed by:

- Bureau for Regional Development
- Centre for Development of the South-East Planning Region
- Municipality of Vasilevo
- Municipality of Novo Selo

Objective of the project:

- To reconstruct the local road axis interchange Karbino, M-6 – Populated place Dobrashinci and the regional landfill. The road is located on the territory of Municipality of Vasilevo but has huge regional significance because it connects all the Municipalities with the regional landfill “Dobrashinci”.

Objectives of the project:

- Improving the local road infrastructure in the South-East planning region
- Improving the living conditions for the inhabitants of this micro region;
- Better start positions in the announcement of the public tender procedures for the construction of the regional landfill, “Dobrashinci”.

Results of the project:

- Reconstructed local road axis from the interchange Karbino, M-6 to the populated place Dobrashinci and the regional landfill in the length of 3918 m.
